Libraries / Technologies Used

Client:

emscripten

Server:

docker

CLOUDFLARE

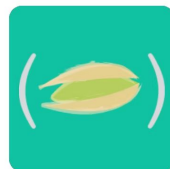

NGINX

libwebsockets

nlohmann-json

JSON for Modern C++

Pistache

MuPDF

unittest

Difficulties Overcome

- Client/Server State Synchronization
- Build Issues
 - Libraries
 - Docker
- Skill Issues
 - Learning while building
 - Bad early decisions
- Integration
 - Relying on systems not yet implemented
 - Explaining to others

Difficulties Not Overcome

- More Efficient Collaboration
 - Work division not equitable due to inconsistent understanding of the system

To Improve:

- More regular meetings
 - Difficult due to time constraints

Work Left to Do

- Planned but not done
 - Export room as PDF
 - Live text edit cursors
- Before shipping
 - User authentication
 - Tighter security
 - Cloud deployment
 - Mobile support

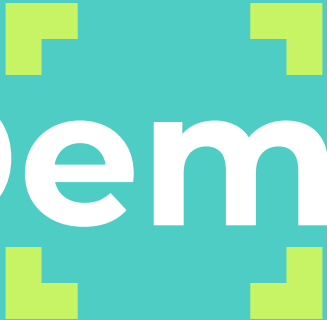

Team Techniques

- Consistent Meetings
 - Twice per week
 - High attendance
- Effective Gitlab Use
 - Iterations (Sprints)
 - Issues (User Stories)
 - Branches
 - Merge

Retrospective

- More frequent meetings
 - Not possible for everyone
- Group coding sessions for infrastructure code
 - Differing skill levels made this hard
 - Time constraints
- Actively asking for help
- More concise and readable code
 - Accelerated learning
 - Slower progress
